ACCESS PANELS
Müdahale Kapakları

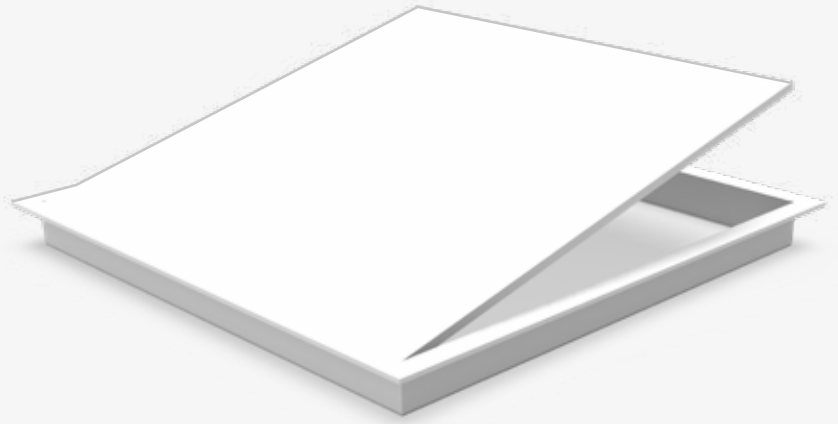

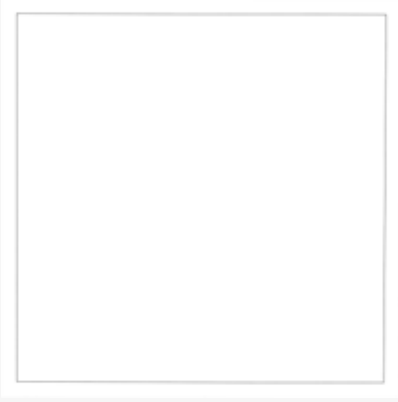

Duct access doors are absolutely essential in any ventilation system. Making quick and simple ongoing cleaning and inspection works, which in the case of safety checks for fire and fire smoke dampers is mandated by law and must be carried out at-least annually.

Kontrol kapakları ve müdahale kapakları havalandırma sistemi uygulamalarında tüm tesisatlarda bakım yapılması gereken yerlerde müdahale edebilmek için kullanılmaktadır. Kontrol kapakları izolasyonlu olarak üretilmektedir.
